

SIKAFLOOR®

GENERAL MAINTENANCE FOR COMFORTFLOOR SYSTEMS

Sikafloor ComfortFloor Maintenance

Your Sikafloor ComfortFloor system optimizes the symmetry between comfort and toughness by balancing ergonomic support and durability. ComfortFloor's flexible polyurethane construction provides comfort in areas where personnel must stand or work for long periods but is tough enough to stand up to heavy pedestrian traffic, chair casters, and wheeled loads.

Because ComfortFloor is a unique flooring system, it requires unique care to maintain its high performance and aesthetics as shown in the table below. Contact Sikafloor Technical Services for additional information.

Initial/Maintenance Installation Cleaning

Following installation broom sweep and dust mop the floor surface. Scrub with a white pad using Taski Stride Citrus. Remove soiled solution with a wet vacuum. Rinse with clean water and wet vacuum.

Initial Treatment		Maintenance Cleaning		Interim Cleaning		Deep Cleaning	
Method	Product	Method	Product	Method	Product	Method	Product
Dust Mop Tool: Taski Lamello	None	Dust Mop Tool: Taski Lamello	None	Dust Mop Tool: Taski Lamello	None	Dust Mop Tool: Taski Lamello	None
